

The distinction between “Interfacer and Experienter”.

The difference between an contactee “Interfacer” and “Experienter” is that the Interfacer has a much higher level of training in the philosophic, psychological and scientific systems employed by the many different ET cultures. Whereas, most Experiencers have little or no training. For those students it may take a life time to understand the true meaning of the contact event. For others Experiencers it may be a instantaneous understanding of the event. This generally depends on the subject pass life experience. If the subject was a “medium” in a pass life on earth, or if they were souls from other worlds, they usually transition very quickly to the level of Interfacer. However karma must support this otherwise it might be a painfully slow process. All past life souls, whether from earth or other worlds have different karma's. Most earth militaries have Interfacers on their crash retrieval staffs. These humans function as interpreters, diplomats and data collectors. As best as I can tell there are two types if Interfacers: Military and Non-Military. Military candidates are carefully selected by humans whose agenda often clash with certain ET races. On the other hand, non-military candidates are chosen by a committee of different ET races for specific purposes. This generally occurs before reincarnation. In my case it was for a breeding program. Hopefully this will provide some small light into the many ET races currently working at this time. As always, take what I say with a grain of salt. You must find your own way. Don't be surprised if your contactee experience clashes with others. Remember that good and evil are two hands folded in prayer to the great creator, that is, good and evil are two sides of the “same coin”. Both are necessary for evolution and eventual membership into the space brotherhood.
